Installation

## Automation

### PLC / HMI / SCADA

We are ready to develop an innovative and efficient automation solutions for existing or new applications. We focus on the automation of machines and processes. Our solutions are based on proven controllers from SIEMENS or SCHNEIDER.

## Installation

BQ is specialized in installation of processing equipment. We are experienced in connecting all devices on machines and production lines. BQ have done a lot of conveyor solutions for internal material handling in e.g. airports, post terminals and packing distribution centres. Including delivery of Switchboards and upgrading of electrical installations.

## Outsourcing

Production outsourcing to Poland has become very popular in the last decade. If you consider this step to increase competitiveness of your business, you're in the right place. We help to choose a concept tailored to your needs. We acquaint you with the local market and regulations so that you can develop business in Poland.
